

ARMCHAIR ARMS IN ALUMINIUM COMPLETE ITEM CITYLOFT

Designer

Pascal Mourgue

Technical characteristics

In 2009, Pascal Mourgue brings us Cityloft, with a 'classic international' style 'to last longer than just a fashion'. A light high-legged structure beautifully accommodates the soft, sophisticated cushions. The armrests in matt black lacquered moulded aluminium are a technical triumph, a perfect foil to an attractive, functional design.

CONSTRUCTION Seat/back in 'mechano-soldered' steel with elastic webbed suspension on seat, supported by a metal element which acts as both front foot and armrest. This element is made from black lacquered case aluminium to match the rear legs.

COMFORT Back and seat cushions are in high resilience polyurethane Bultex foam 38 kg/m³ – 3.6 kPa with a comfort layer in ultra-flexible polyurethane foam 30 kg/m³ – 1.8 kPa. The backcushions are clad in 110 g/m² polyester quilting and are complemented with a small feather-filled lumbar cushion. The 2 settees have arm cushions (foam + feather) which are designed to mould themselves to the sweeping curve of the aluminium arms. **MAKING-UP**

DIMENSIONS

Height 840 mm | Width 890 mm | Depth 1,060 mm | Seat height 460 mm |
Seats 1 | Weight 30 kg

Removable covers.
