

# VALMY

## Designer

Ramy Fischler

## Technical characteristics

The Valmy armchair/bridge was initially designed for a pared-down, relaxing, comfortable hotel bedroom. We would imagine it as the hyphen between timeliness and thoughtfulness. Very quickly its shape and purpose emerged as if they were sheer simplicity, rendering this armchair perfectly suited to all types of contexts, colors and materials.

**CONSTRUCTION** Structure in steel wire clad in injected foam. Base in bent solid beech, either anthracite-stained or finished with a natural varnish; or in black lacquered metal. Structure of seat in panels of plywood. **COMFORT** The back and armrests are composed of injected polyurethane foam (35 kg/m<sup>3</sup> – 3.2 kPa), with the exterior clad in 110 g/m<sup>2</sup> polyester quilting. The seat is composed of high resilience polyurethane Bultex foam (42 kg/m<sup>3</sup> – 4.8 kPa and 38 kg/m<sup>3</sup> – 2.8 kPa) clad in 110 g/m<sup>2</sup> polyester quilting. **MAKING-UP** Interior of back cover quilted with polyether foam (21 kg/m<sup>3</sup> – 3.1 kPa), with the motif created by an automated sewing robot. 5 mm baguette stitch detailing on seat. Covers may be removed by a professional.
