

CUSHION COVER MESCAL

Technical characteristics

The Mescal cushion for outdoors use is made in polyethylene terephthalate (or PET) which is a very resistant and flexible synthetic material. PET is usually made of fibres mixed with binders which offer texture and durability. It is also known to be a hypoallergenic and stain resistant material. These qualities make it a very popular material for cushions, as it is easy to clean and maintain its shape and comfort for many years. Inner cushion sold separately, in polyester fibre, completely designed for outdoors.
