Numéro111

Technical characteristics

Geometric forms, muted colours, ornamental objects/sculptures, Art Deco style continues to inspire current contemporary design. Each of the two Arceau hand mirrors – H 62 or H 45.5 – exude elegance and rigour. The large version is in rouge oxydé (rust red) lacquered MDF whilst the small version is in rouge beige, either smooth or with a highly graphic grooved effect, and a mirrored side. The play of volumes, an association of right angles and soft curves, is extremely evocative. Beyond their function, their sculptural lines affirm their singular presence within the domestic sphere, no matter whether they are used in isolation or in association.
