

PLATE STAND FACES

Designer

Studio Shulab

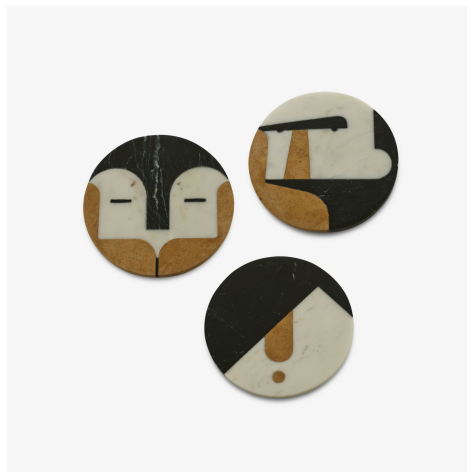

Technical characteristics

Plate stand made of 3 different famous marbles from Rajasthan (white marble, black marble, light brown marble called Forest Gold) thus evoking faces. We can distinguish on each plate stand a face: Aristotle, Dante and Descartes which allows to differentiate them. Both aesthetic and functional: the marble will endure all temperature differences. And a cork underlay will guarantee the insulation with the surface of the table. Each piece of marble is made from a waterjet cutting system and then the marble pieces are glued together. Finally it is sanded and polished.
