

MOLD

Designer

Kateryna Sokolova

Technical characteristics

The name of this vase, Mold, goes to the very heart of the product (mold = a mould), explicitly referencing its production method, moulding, and retaining its complete form with no final chipping away of offcuts. Vase in gris or chocolat-coloured moulded concrete. A test tube in borosilicate glass (H 37 Ø 2.6 cm) is set into the interior, along its full height, to take flowers.
