Anam - bookcase

Designer Federico Peri
Produzione / Production year: 2025

Descrizione

Come una scala che conduce verso l'infinito, la libreria Anam si sviluppa in un gentile equilibrio tra leggerezza e solidità.

Ogni libro, ogni oggetto, trova in questa struttura uno spazio di rispetto e poesia e si offre come custode delle memorie che scegliamo.

I materiali raccontano una storia, la parte superiore rigida e decisa evoca la stabilità di ciò che dura nel tempo, la parte inferiore rivestita in tessuto, sussurra una gentilezza inattesa. La sua presenza non domina lo spazio ma lo arricchisce, suggerendo un dialogo tra ciò che vediamo e ciò che immaginiamo.

Nella versione Autoportante, la struttura metallica è un pezzo unico, non smontabile.

Struttura

In tubolari d'acciaio verniciati 60x40 mm, spessore 2 mm. Trasversali di appoggio mensola in acciaio verniciato dal diametro 20 mm. Ogni gamba della struttura autoportante è provvista di feltro.

Nella versione componibile a parete, ogni montante verticale è provvisto di piedino regolabile in altezza e il fissaggio della mensola è garantito da una piastra in acciaio verniciato spessore 4 mm che si aggancia alla parete.

Mensola

Anam propone due tipi di mensola: versione totalmente laccata e versione rivestita.

Versione totalmente laccata

Realizzata con 2 piani in MDF laccati spessore 19 mm collegati tra loro.

Versione rivestita

Realizzata con 2 piani in MDF spessore 19 mm. Finitura laccata per la parte superiore e rivestito con tessuto in microfibra, in tinta coordinata alla nuance di laccatura, per la parte inferiore.

Description

Like a staircase leading to infinity, the Anam bookcase develops gently, finding balance between lightness and solidity.

Every book and every object find a space of respect and poetry within this structure, and offers itself as a guardian of our chosen memories.

The materials themselves tell a story: the rigid and decisive upper part evokes the stability of things that last over time, the lower part, upholstered in fabric, whispers an unexpected kindness. Its presence does not dominate the space but rather enriches it, suggesting a dialogue between what we see and what we imagine.

In Freestanding version, the metallic structure is one piece, cannot be disassembled.

Structure

In painted wire drawn steel 60x40 mm, 2 mm of thickness. Transversal shelf support in painted steel with diameter 20 mm. Each leg of freestanding structure is fitted with felt.

In wall-modular version, each vertical upright is provided with a height-adjustable foot and the shelf is hooked to the wall through painted steel plate, 4 mm thick.

Shelf

Anam proposes two kinds of shelf: totally lacquered version and coated version.

Totally lacquered version

Made with 2 lacquered MDF tops, 19 mm thick connected together

Coated version

Made with 2 MDF tops, 19 mm thick. Lacquered finish for the upper part and covered with microfibre fabric, in coordinated-colour with lacquer, for the lower part.
